Iron Frontier: Units

All 11 units in the game, with their job, stats, current look, and prompts to paste into ChatGPT. The prompts ask for the same style as your Vanguard Batch 1 buildings so everything matches.

Match this style

Your Batch 1 buildings, already in the game. Attach this picture (or one of your building images) in ChatGPT with each prompt.

What to make for each unit

1. Main image (required): the unit facing the front-right, like the buildings. White background, square. Name it by ID, for example **U07-A.png**. This becomes the sidebar build icon right away.

2. Direction sheet (optional, for the battlefield): units turn as they drive, so one picture cannot face every way. A sheet of the same unit in 8 directions lets it turn on the map. Name it **U07-A-dirs.png**. Without a sheet the unit keeps its 3D model on the battlefield and uses your picture in the sidebar.

3. Red Dominion (later): the same prompts with "gunmetal grey (#58595D) with red trim (#B3261E)" in place of the Vanguard colors. Name these **U07-B.png**.

All units

ID	Now in game	Unit	Job	Cost	Armor	Weapon
U01		**Rifleman** Infantry	Cheap infantry. Good against infantry.	$100	Infantry, 50 HP	Assault rifle
U02		**Grenadier** Infantry	Lobs grenades with splash damage. Good against groups and buildings.	$160	Infantry, 50 HP	Grenades (splash)
U03		**Rocket Soldier** Infantry	Good against vehicles and towers.	$300	Infantry, 45 HP	Shoulder rocket launcher
U04		**Engineer** Infantry	Captures enemy structures. Order it onto an enemy building.	$500	Infantry, 30 HP	None
U05		**Recon Buggy** Vehicle	Fast scout with a machine gun. Good for raiding harvesters.	$300	Light, 140 HP	Machine gun

ID	Now in game	Unit	Job	Cost	Armor	Weapon
U06		**Light Tank** **Vehicle**	Quick, cheap tank.	$600	Heavy, 300 HP	Short cannon
U07		**Medium Tank** **Vehicle**	Main battle tank. Solid all-rounder.	$800	Heavy, 420 HP	Long cannon
U08		**Heavy Tank** **Vehicle**	Twin cannons and heavy armor. Repairs itself to half health. Needs a Comm Center.	$1,500	Heavy, 800 HP	Twin cannons
U09		**Artillery** **Vehicle**	Long-range shells with splash. Cannot hit targets up close. Needs a Comm Center.	$600	Light, 110 HP	Howitzer (long range, splash)
U10		**Harvester** **Vehicle**	Collects crystal and brings it to a Refinery.	$1,400	Heavy, 600 HP	None
U11		**MCV** **Vehicle**	Mobile Construction Vehicle. Deploys into a Construction Yard. Needs a Comm Center.	$3,000	Heavy, 800 HP	None

U01 · Rifleman

Infantry · $100

Cheap infantry. Good against infantry.

Armor: Infantry, 50 HP
Weapon: Assault rifle
Size on the map: about 0.4 tiles

Note: the left render shows the Vanguard model in the game now, the right one the Red Dominion model. Copy the idea, not these shapes.

Prompt 1: main image

Make a game unit image: **Rifleman**, a single soldier in olive fatigues and a gold-striped helmet, holding an assault rifle at the ready, webbing and pouches. Same art style as my Iron Frontier building images: detailed, hand-painted real-time-strategy game art like classic Command and Conquer, isometric 3/4 view from the front-right corner, looking down at about 35 degrees, soft sun from the upper left. Vanguard faction colors: olive drab (#8A8457) with bold gold-yellow trim stripes (#D9AE3A), weathered metal, small details. One soldier only, centered, filling about 80 percent of the frame, on a plain pure white background, no ground, no shadow, no text. Square image, 1024 x 1024.

Save as **U01-A.png**.

Prompt 2: direction sheet (optional)

Using the Rifleman you just made, make a direction sheet: the exact same soldier drawn 8 times in a 4 x 2 grid, same size and same camera height in every cell, turned to face: south (toward the viewer), south-west, west, north-west, north (away from the viewer), north-east, east, south-east, in that order, left to right then top to bottom. Plain pure white background, even spacing, no labels, no grid lines. Wide image, 2048 x 1024.

Save as **U01-A-dirs.png**.

Soldiers are tiny on the map, so keep the shape bold and simple: clear silhouette, bright gold helmet stripe, chunky gear.

U02 · Grenadier

Infantry · $160

Lobs grenades with splash damage. Good against groups and buildings.

Armor: Infantry, 50 HP
Weapon: Grenades (splash)
Size on the map: about 0.4 tiles

Note: the left render shows the Vanguard model in the game now, the right one the Red Dominion model. Copy the idea, not these shapes.

Prompt 1: main image

Make a game unit image: **Grenadier**, a single soldier in olive fatigues and helmet, mid-throw with a grenade raised, grenade bandolier across the chest and a bag on the hip. Same art style as my Iron Frontier building images: detailed, hand-painted real-time-strategy game art like classic Command and Conquer, isometric 3/4 view from the front-right corner, looking down at about 35 degrees, soft sun from the upper left. Vanguard faction colors: olive drab (#8A8457) with bold gold-yellow trim stripes (#D9AE3A), weathered metal, small details. One soldier only, centered, filling about 80 percent of the frame, on a plain pure white background, no ground, no shadow, no text. Square image, 1024 x 1024.

Save as **U02-A.png**.

Prompt 2: direction sheet (optional)

Using the Grenadier you just made, make a direction sheet: the exact same soldier drawn 8 times in a 4 x 2 grid, same size and same camera height in every cell, turned to face: south (toward the viewer), south-west, west, north-west, north (away from the viewer), north-east, east, south-east, in that order, left to right then top to bottom. Plain pure white background, even spacing, no labels, no grid lines. Wide image, 2048 x 1024.

Save as **U02-A-dirs.png**.

Soldiers are tiny on the map, so keep the shape bold and simple: clear silhouette, bright gold helmet stripe, chunky gear.

U03 · Rocket Soldier

Infantry · $300

Good against vehicles and towers.

Armor: Infantry, 45 HP
Weapon: Shoulder rocket launcher
Size on the map: about 0.4 tiles

Note: the left render shows the Vanguard model in the game now, the right one the Red Dominion model. Copy the idea, not these shapes.

Prompt 1: main image

Make a game unit image: **Rocket Soldier**, a single soldier in olive fatigues and helmet, kneeling with a long olive-and-gold shoulder rocket launcher, spare rockets on the back. Same art style as my Iron Frontier building images: detailed, hand-painted real-time-strategy game art like classic Command and Conquer, isometric 3/4 view from the front-right corner, looking down at about 35 degrees, soft sun from the upper left. Vanguard faction colors: olive drab (#8A8457) with bold gold-yellow trim stripes (#D9AE3A), weathered metal, small details. One soldier only, centered, filling about 80 percent of the frame, on a plain pure white background, no ground, no shadow, no text. Square image, 1024 x 1024.

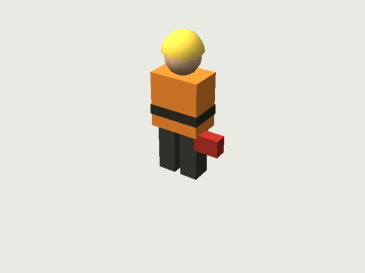

Save as **U03-A.png**.

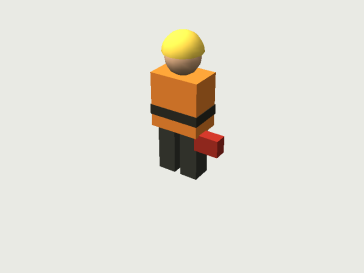

Prompt 2: direction sheet (optional)

Using the Rocket Soldier you just made, make a direction sheet: the exact same soldier drawn 8 times in a 4 x 2 grid, same size and same camera height in every cell, turned to face: south (toward the viewer), south-west, west, north-west, north (away from the viewer), north-east, east, south-east, in that order, left to right then top to bottom. Plain pure white background, even spacing, no labels, no grid lines. Wide image, 2048 x 1024.

Save as **U03-A-dirs.png**.

Soldiers are tiny on the map, so keep the shape bold and simple: clear silhouette, bright gold helmet stripe, chunky gear.

U04 · Engineer

Infantry · $500

Captures enemy structures. Order it onto an enemy building.

Armor: Infantry, 30 HP
Weapon: None
Size on the map: about 0.4 tiles

Note: the left render shows the Vanguard model in the game now, the right one the Red Dominion model. Copy the idea, not these shapes.

Prompt 1: main image

Make a game unit image: **Engineer**, a single unarmed engineer in an orange safety vest over olive overalls, yellow hard hat, carrying a red toolbox. Same art style as my Iron Frontier building images: detailed, hand-painted real-time-strategy game art like classic Command and Conquer, isometric 3/4 view from the front-right corner, looking down at about 35 degrees, soft sun from the upper left. Vanguard faction colors: olive drab (#8A8457) with bold gold-yellow trim stripes (#D9AE3A), weathered metal, small details. One soldier only, centered, filling about 80 percent of the frame, on a plain pure white background, no ground, no shadow, no text. Square image, 1024 x 1024.

Save as **U04-A.png**.

Prompt 2: direction sheet (optional)

Using the Engineer you just made, make a direction sheet: the exact same soldier drawn 8 times in a 4 x 2 grid, same size and same camera height in every cell, turned to face: south (toward the viewer), south-west, west, north-west, north (away from the viewer), north-east, east, south-east, in that order, left to right then top to bottom. Plain pure white background, even spacing, no labels, no grid lines. Wide image, 2048 x 1024.

Save as **U04-A-dirs.png**.

Soldiers are tiny on the map, so keep the shape bold and simple: clear silhouette, bright gold helmet stripe, chunky gear.

U05 · Recon Buggy

Vehicle · $300

Fast scout with a machine gun. Good for raiding harvesters.

Armor: Light, 140 HP
Weapon: Machine gun
Size on the map: about 0.8 tiles long

Note: the left render shows the Vanguard model in the game now, the right one the Red Dominion model. Copy the idea, not these shapes.

Prompt 1: main image

Make a game unit image: **Recon Buggy**, a four-wheel open-frame dune buggy with a roll cage, big off-road tires and a pintle machine gun mounted behind the seats. Same art style as my Iron Frontier building images: detailed, hand-painted real-time-strategy game art like classic Command and Conquer, isometric 3/4 view from the front-right corner, looking down at about 35 degrees, soft sun from the upper left. Vanguard faction colors: olive drab (#8A8457) with bold gold-yellow trim stripes (#D9AE3A), weathered metal, small details. One vehicle only, centered, filling about 80 percent of the frame, on a plain pure white background, no ground, no shadow, no text. Square image, 1024 x 1024.

Save as **U05-A.png**.

Prompt 2: direction sheet (optional)

Using the Recon Buggy you just made, make a direction sheet: the exact same vehicle drawn 8 times in a 4 x 2 grid, same size and same camera height in every cell, turned to face: south (toward the viewer), south-west, west, north-west, north (away from the viewer), north-east, east, south-east, in that order, left to right then top to bottom. Plain pure white background, even spacing, no labels, no grid lines. Wide image, 2048 x 1024.

Save as **U05-A-dirs.png**.

U06 · Light Tank

Vehicle · $600

Quick, cheap tank.

Armor: Heavy, 300 HP
Weapon: Short cannon
Size on the map: about 0.9 tiles long

Note: the left render shows the Vanguard model in the game now, the right one the Red Dominion model. Copy the idea, not these shapes.

Prompt 1: main image

Make a game unit image: **Light Tank**, a small fast tracked tank with a low angular hull, small turret and a short cannon. Same art style as my Iron Frontier building images: detailed, hand-painted real-time-strategy game art like classic Command and Conquer, isometric 3/4 view from the front-right corner, looking down at about 35 degrees, soft sun from the upper left. Vanguard faction colors: olive drab (#8A8457) with bold gold-yellow trim stripes (#D9AE3A), weathered metal, small details. One vehicle only, centered, filling about 80 percent of the frame, on a plain pure white background, no ground, no shadow, no text. Square image, 1024 x 1024.

Save as **U06-A.png**.

Prompt 2: direction sheet (optional)

Using the Light Tank you just made, make a direction sheet: the exact same vehicle drawn 8 times in a 4 x 2 grid, same size and same camera height in every cell, turned to face: south (toward the viewer), south-west, west, north-west, north (away from the viewer), north-east, east, south-east, in that order, left to right then top to bottom. Plain pure white background, even spacing, no labels, no grid lines. Wide image, 2048 x 1024.

Save as **U06-A-dirs.png**.

U07 · Medium Tank

Vehicle · $800

Main battle tank. Solid all-rounder.

Armor: Heavy, 420 HP
Weapon: Long cannon
Size on the map: about 1 tile long

Note: the left render shows the Vanguard model in the game now, the right one the Red Dominion model. Copy the idea, not these shapes.

Prompt 1: main image

Make a game unit image: **Medium Tank**, a main battle tank with sloped armor, a large turret, long cannon with a muzzle brake, side skirts over the tracks. Same art style as my Iron Frontier building images: detailed, hand-painted real-time-strategy game art like classic Command and Conquer, isometric 3/4 view from the front-right corner, looking down at about 35 degrees, soft sun from the upper left. Vanguard faction colors: olive drab (#8A8457) with bold gold-yellow trim stripes (#D9AE3A), weathered metal, small details. One vehicle only, centered, filling about 80 percent of the frame, on a plain pure white background, no ground, no shadow, no text. Square image, 1024 x 1024.

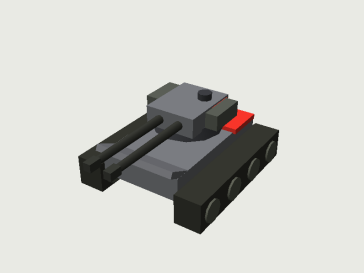

Save as **U07-A.png**.

Prompt 2: direction sheet (optional)

Using the Medium Tank you just made, make a direction sheet: the exact same vehicle drawn 8 times in a 4 x 2 grid, same size and same camera height in every cell, turned to face: south (toward the viewer), south-west, west, north-west, north (away from the viewer), north-east, east, south-east, in that order, left to right then top to bottom. Plain pure white background, even spacing, no labels, no grid lines. Wide image, 2048 x 1024.

Save as **U07-A-dirs.png**.

U08 · Heavy Tank

Vehicle · $1,500

Twin cannons and heavy armor. Repairs itself to half health. Needs a Comm Center.

Armor: Heavy, 800 HP
Weapon: Twin cannons
Size on the map: about 1.2 tiles long

Note: the left render shows the Vanguard model in the game now, the right one the Red Dominion model. Copy the idea, not these shapes.

Prompt 1: main image

Make a game unit image: **Heavy Tank**, a huge heavy tank with a wide double-track hull, a massive turret with twin long cannons and a missile pod on each side of the turret. Same art style as my Iron Frontier building images: detailed, hand-painted real-time-strategy game art like classic Command and Conquer, isometric 3/4 view from the front-right corner, looking down at about 35 degrees, soft sun from the upper left. Vanguard faction colors: olive drab (#8A8457) with bold gold-yellow trim stripes (#D9AE3A), weathered metal, small details. One vehicle only, centered, filling about 80 percent of the frame, on a plain pure white background, no ground, no shadow, no text. Square image, 1024 x 1024.

Save as **U08-A.png**.

Prompt 2: direction sheet (optional)

Using the Heavy Tank you just made, make a direction sheet: the exact same vehicle drawn 8 times in a 4 x 2 grid, same size and same camera height in every cell, turned to face: south (toward the viewer), south-west, west, north-west, north (away from the viewer), north-east, east, south-east, in that order, left to right then top to bottom. Plain pure white background, even spacing, no labels, no grid lines. Wide image, 2048 x 1024.

Save as **U08-A-dirs.png**.

U09 · Artillery

Vehicle · $600

Long-range shells with splash. Cannot hit targets up close. Needs a Comm Center.

Armor: Light, 110 HP
Weapon: Howitzer (long range, splash)
Size on the map: about 1 tile long

Note: the left render shows the Vanguard model in the game now, the right one the Red Dominion model. Copy the idea, not these shapes.

Prompt 1: main image

Make a game unit image: **Artillery**, a tracked self-propelled howitzer with an open gun deck, stabilizer legs and a very long barrel raised high. Same art style as my Iron Frontier building images: detailed, hand-painted real-time-strategy game art like classic Command and Conquer, isometric 3/4 view from the front-right corner, looking down at about 35 degrees, soft sun from the upper left. Vanguard faction colors: olive drab (#8A8457) with bold gold-yellow trim stripes (#D9AE3A), weathered metal, small details. One vehicle only, centered, filling about 80 percent of the frame, on a plain pure white background, no ground, no shadow, no text. Square image, 1024 x 1024.

Save as **U09-A.png**.

Prompt 2: direction sheet (optional)

Using the Artillery you just made, make a direction sheet: the exact same vehicle drawn 8 times in a 4 x 2 grid, same size and same camera height in every cell, turned to face: south (toward the viewer), south-west, west, north-west, north (away from the viewer), north-east, east, south-east, in that order, left to right then top to bottom. Plain pure white background, even spacing, no labels, no grid lines. Wide image, 2048 x 1024.

Save as **U09-A-dirs.png**.

U10 · Harvester

Vehicle · $1,400

Collects crystal and brings it to a Refinery.

Armor: Heavy, 600 HP
Weapon: None
Size on the map: about 1.1 tiles long

Note: the left render shows the Vanguard model in the game now, the right one the Red Dominion model. Copy the idea, not these shapes.

Prompt 1: main image

Make a game unit image: **Harvester**, a big tracked mining vehicle with a toothed scoop drum at the front, cab on one side and an open rear hopper heaped with glowing green crystal. Same art style as my Iron Frontier building images: detailed, hand-painted real-time-strategy game art like classic Command and Conquer, isometric 3/4 view from the front-right corner, looking down at about 35 degrees, soft sun from the upper left. Vanguard faction colors: olive drab (#8A8457) with bold gold-yellow trim stripes (#D9AE3A), weathered metal, small details. One vehicle only, centered, filling about 80 percent of the frame, on a plain pure white background, no ground, no shadow, no text. Square image, 1024 x 1024.

Save as **U10-A.png**.

Prompt 2: direction sheet (optional)

Using the Harvester you just made, make a direction sheet: the exact same vehicle drawn 8 times in a 4 x 2 grid, same size and same camera height in every cell, turned to face: south (toward the viewer), south-west, west, north-west, north (away from the viewer), north-east, east, south-east, in that order, left to right then top to bottom. Plain pure white background, even spacing, no labels, no grid lines. Wide image, 2048 x 1024.

Save as **U10-A-dirs.png**.

U11 · MCV

Vehicle · $3,000

Mobile Construction Vehicle. Deploys into a Construction Yard. Needs a Comm Center.

Armor: Heavy, 800 HP
Weapon: None
Size on the map: about 1.3 tiles long

Note: the left render shows the Vanguard model in the game now, the right one the Red Dominion model. Copy the idea, not these shapes.

Prompt 1: main image

Make a game unit image: **MCV**, a large six-wheeled heavy truck carrying a folded boxy construction module on its back, with a small folded crane arm on top. Same art style as my Iron Frontier building images: detailed, hand-painted real-time-strategy game art like classic Command and Conquer, isometric 3/4 view from the front-right corner, looking down at about 35 degrees, soft sun from the upper left. Vanguard faction colors: olive drab (#8A8457) with bold gold-yellow trim stripes (#D9AE3A), weathered metal, small details. One vehicle only, centered, filling about 80 percent of the frame, on a plain pure white background, no ground, no shadow, no text. Square image, 1024 x 1024.

Save as **U11-A.png**.

Prompt 2: direction sheet (optional)

Using the MCV you just made, make a direction sheet: the exact same vehicle drawn 8 times in a 4 x 2 grid, same size and same camera height in every cell, turned to face: south (toward the viewer), south-west, west, north-west, north (away from the viewer), north-east, east, south-east, in that order, left to right then top to bottom. Plain pure white background, even spacing, no labels, no grid lines. Wide image, 2048 x 1024.

Save as **U11-A-dirs.png**.
