ART ASSET PROFILES

Iron Frontier

Image profiles for every building, unit and effect in the game, with ready-to-paste prompts for generating high-quality artwork in ChatGPT.

Contents	How to use this with ChatGPT (page 2) · Style guide (page 3) · 11 structures (S01–S11) · 11 units (U01–U11) · 8 environment, effects and logo profiles (E01–E08) · Checklist
Each profile has	The current in-game model in both faction colors (for shape only), what the asset does, its size, what it must include, and two prompts: one per faction.
Reference files	The same renders are saved as separate PNG files in game/art-profiles/reference-renders/ in the repository, if you would rather attach them one at a time.

GETTING STARTED

How to use this with ChatGPT

ChatGPT makes one image per request, so work through the profiles one at a time. The renders in this PDF are the current, simple in-game models: use them for shape and layout only, and let the prompt describe the finished look.

1. Start a new chat and attach this PDF

Then paste this message:

FIRST MESSAGE

```
I am making a real-time strategy game called Iron Frontier. The attached PDF has an art profile for each
game asset: an ID, a reference render of the current low-detail model, details, and a prompt. When I give
you a profile ID, generate that image by following its prompt exactly. Use the reference render only for
the overall shape and layout, not its simple style. Keep every image consistent with the Style Guide page:
same camera angle, lighting and palette, and a transparent background unless the profile says otherwise.
Start with prompt S01-A.
```

2. Ask for the next profile

After each image, send the next ID, for example "Now do U07-A". For the enemy faction, ask for the -B prompt, or say "Same image, Red Dominion colors".

3. Keep the set consistent

- If an image drifts in style, say "Match the camera angle, lighting and level of detail of image S01" and regenerate.
- If the background comes back white instead of transparent, ask "Make the background fully transparent and give me the PNG".
- Generate the Vanguard (-A) version of everything first, then the Red Dominion (-B) versions, so each faction is consistent.
- Save each file named by its profile ID, for example S01-A.png or U07-B.png. That makes them easy to drop back into the game.

4. Bring them back

Upload the finished PNGs here. They can go straight in as the sidebar build icons and the title logo. For the 3D battlefield models, the images work as concept art: an image-to-3D tool can turn them into 3D model files (.glb) that can be loaded into the game.

STYLE GUIDE

One look for every asset

Every prompt already includes these rules. They are listed here so the whole set stays consistent.

Art style	Highly detailed pre-rendered 3D game asset for a classic-style 1990s real-time strategy game, remastered in high resolution. Realistic materials: weathered painted steel, cast concrete, canvas, rubber, burlap. Crisp silhouette, subtle wear, dust and dirt, muted military palette.
Camera & light	Camera: classic overhead strategy-game view. The camera is directly in front of the object (not turned toward a corner) and looks down at about 58 degrees, so the front face points straight at the bottom of the image, the roof is clearly visible, and the base reads as a level rectangle. Whole object in frame, centered, with a small margin. Lighting: warm sun from the upper left, soft shadow cast toward the lower right.
Output	Output: square 1024x1024 PNG with a fully transparent background. No text, numbers, logos, insignia or watermarks.
Avoid	Real-world military markings, national flags, brand names, the names of existing games or franchises, text on the models, and cartoon or toy-like proportions.

Vanguard (player)

#8A8457
Body: olive-drab tan

#D9AE3A
Trim: mustard gold

#4F4B32
Accent: dark olive

Red Dominion (enemy)

#58595D
Body: gunmetal grey

#B3261E
Trim: crimson

#2C2D30
Accent: near black

Shared materials

#74756E
Concrete foundations

#9C9A8A
Building walls

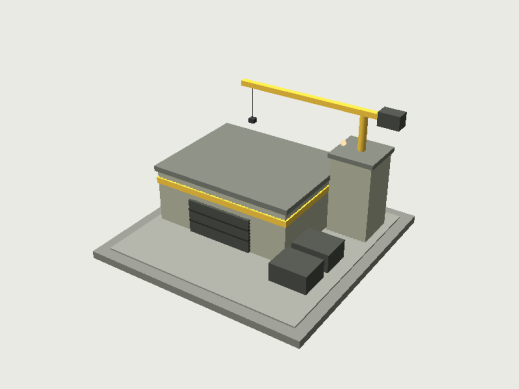

#56E04A
Crystal glow (green)

In-game scale

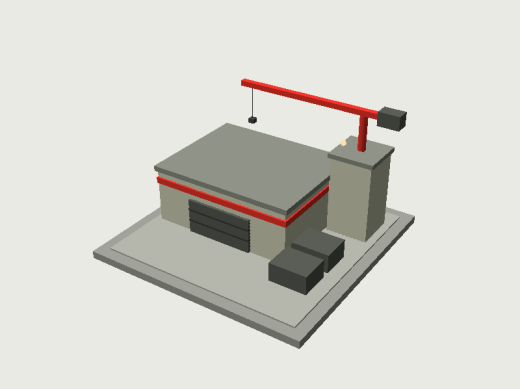

One map tile is roughly 10 m. Structures sit on a tile grid (their footprints are listed on each profile); infantry are tiny next to buildings, and a Medium Tank is about two-thirds of one tile long. Keep that sense of scale when describing changes to ChatGPT.

STRUCTURE · PROFILE S01

Construction Yard

Current in-game model · Vanguard (player)

Current in-game model · Red Dominion (enemy)

Role in game	Builds every structure; the heart of the base. Deploys from the MCV.
Footprint / size	3 x 3 tiles (about 30 m square)
Must include	Concrete foundation slab with a lighter inset. A long prefabricated assembly hall with a flat metal roof and a faction-colored band. Wide roll-up bay door with horizontal ribs. A tall square corner tower topped by a slewing tower crane: long boom painted in the trim color, counterweight block, cable and hook. Small red warning beacon on the tower. Equipment crates beside the hall.

PROMPT S01-A · Vanguard version (copy this into ChatGPT)

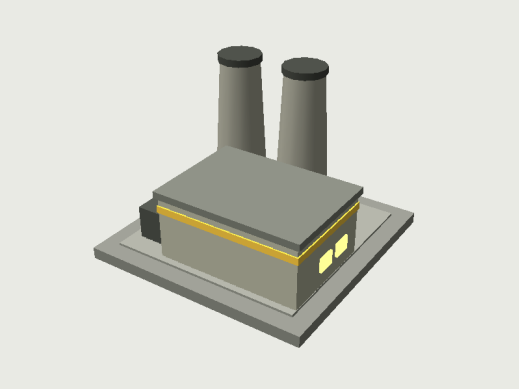

```

Highly detailed pre-rendered 3D game asset for a classic-style 1990s real-time strategy game, remastered in high resolution. Realistic materials: weathered painted steel, cast concrete, canvas, rubber, burlap. Crisp silhouette, subtle wear, dust and dirt, muted military palette. Subject: Advanced Tower. A tall square concrete tower with a faction-colored band near the top, carrying a rotating turret fitted with two box-shaped missile launch pods. Vanguard faction colors: olive-drab tan body (#8A8457), mustard-gold trim stripes (#D9AE3A), dark olive accents (#4F4B32). Camera: classic overhead strategy-game view. The camera is directly in front of the object (not turned toward a corner) and looks down at about 58 degrees, so the front face points straight at the bottom of the image, the roof is clearly visible, and the base reads as a level rectangle. Whole object in frame, centered, with a small margin. Lighting: warm sun from the upper left, soft shadow cast toward the lower right. Output: square 1024x1024 PNG with a fully transparent background. No text, numbers, logos, insignia or watermarks.

Realistic materials: weathered painted steel, cast concrete, canvas, rubber, burlap. Crisp silhouette, subtle wear, dust and dirt, muted military palette. Subject: Harvester. A large heavy-duty tracked mining vehicle with a big rotating cutting drum across the front, a cab with windows on one side, and an open hopper on the back heaped with glowing green crystal shards. Dirty and well used. Red Dominion faction colors: gunmetal grey body (#58595D), crimson trim stripes (#B3261E), near-black accents (#2C2D30). Camera: classic overhead strategy-game view. The camera is directly in front of the object (not turned toward a corner) and looks down at about 58 degrees, so the front face points straight at the bottom of the image, the roof is clearly visible, and the base reads as a level rectangle. Whole object in frame, centered, with a small margin. Lighting: warm sun from the upper left, soft shadow cast toward the lower right. Output: square 1024x1024 PNG with a fully transparent background. No text, numbers, logos, insignia or watermarks.
```

UNIT · PROFILE U11

MCV (Mobile Construction Vehicle)

Current in-game model · Vanguard (player)

Current in-game model · Red Dominion (enemy)

Role in game	Deploys into a Construction Yard.
Footprint / size	Six-wheeled, about 11 m long
Must include	A six-wheeled heavy truck with a cab at the front and a large boxy construction module on the back, a folded crane arm lying on top, a small white dish, and a trim band around the module.

PROMPT U11-A · Vanguard version (copy this into ChatGPT)

```
Highly detailed pre-rendered 3D game asset for a classic-style 1990s real-time strategy game, remastered in high resolution. Realistic materials: weathered painted steel, cast concrete, canvas, rubber, burlap. Crisp silhouette, subtle wear, dust and dirt, muted military palette. Subject: MCV (Mobile Construction Vehicle). A six-wheeled heavy truck with a cab at the front and a large boxy construction module on the back, a folded crane arm lying on top, a small white dish, and a trim band around the module. Vanguard faction colors: olive-drab tan body (#8A8457), mustard-gold trim stripes (#D9AE3A), dark olive accents (#4F4B32). Camera: classic overhead strategy-game view. The camera is directly in front of the object (not turned toward a corner) and looks down at about 58 degrees, so the front face points straight at the bottom of the image, the roof is clearly visible, and the base reads as a level rectangle. Whole object in frame, centered, with a small margin. Lighting: warm sun from the upper left, soft shadow cast toward the lower right. Output: square 1024x1024 PNG with a fully transparent background. No text, numbers, logos, insignia or watermarks.

ENVIRONMENT, EFFECTS & LOGO

Terrain, effects and title art

These have no single in-game model to show. Each prompt is self-contained.

E01 · Ground terrain tile

Seamless texture for the battlefield floor.

PROMPT E01

```
Seamless tileable top-down ground texture for a temperate RTS battlefield: patchy olive grass, worn brown dirt, small pebbles and fine soil detail. Viewed straight down, even lighting, no shadows of objects, no perspective. Output: 1024x1024 PNG that tiles seamlessly on all four edges.
```

E02 · Crystal field

The resource harvesters collect. Hurts infantry standing in it.

PROMPT E02

```
Highly detailed pre-rendered 3D game asset for a classic-style 1990s real-time strategy game, remastered in high resolution. Realistic materials: weathered painted steel, cast concrete, canvas, rubber, burlap. Crisp silhouette, subtle wear, dust and dirt, muted military palette. Subject: clusters of glowing green crystalline spikes growing out of dark soil, in four different sizes from a single small sprout to a dense cluster, arranged in a row on one sheet. Camera: classic overhead strategy-game view. The camera is directly in front of the object (not turned toward a corner) and looks down at about 58 degrees, so the front face points straight at the bottom of the image, the roof is clearly visible, and the base reads as a level rectangle. Whole object in frame, centered, with a small margin. Lighting: warm sun from the upper left, soft shadow cast toward the lower right. Output: 2048x512 PNG sprite sheet with a fully transparent background. No text.
```

E03 · Rocks

Impassable terrain.

PROMPT E03

```
Highly detailed pre-rendered 3D game asset for a classic-style 1990s real-time strategy game, remastered in high resolution. Realistic materials: weathered painted steel, cast concrete, canvas, rubber, burlap. Crisp silhouette, subtle wear, dust and dirt, muted military palette. Subject: four variations of grey weathered boulder groups, from one rock to a cluster of three, arranged in a row. Camera: classic overhead strategy-game view. The camera is directly in front of the object (not turned toward a corner) and looks down at about 58 degrees, so the front face points straight at the bottom of the image, the roof is clearly visible, and the base reads as a level rectangle. Whole object in frame, centered, with a small margin. Lighting: warm sun from the upper left, soft shadow cast toward the lower right. Output: 2048x512 PNG sprite sheet with a fully transparent background. No text.
```

E04 · Trees

Impassable terrain along the map.

PROMPT E04

```
Highly detailed pre-rendered 3D game asset for a classic-style 1990s real-time strategy game, remastered in high resolution. Realistic materials: weathered painted steel, cast concrete, canvas, rubber, burlap. Crisp silhouette, subtle wear, dust and dirt, muted military palette. Subject: four variations of temperate deciduous trees with round leafy crowns in slightly different greens, arranged in a row. Camera: classic overhead strategy-game view. The camera is directly in front of the object (not turned toward a corner) and looks down at about 58 degrees, so the front face points straight at the bottom of the image, the roof is clearly visible, and the base reads as a level rectangle. Whole object in frame, centered, with a small margin. Lighting: warm sun from the upper left, soft shadow cast toward the lower right. Output: 2048x512 PNG sprite sheet with a fully transparent background. No text.
```

E05 · Explosion

Plays when units and buildings are destroyed.

PROMPT E05

```
Game VFX sprite sheet: an 8-frame explosion animation in a single row, from a bright white-yellow flash, to an orange fireball, to dark rolling smoke fading away. Viewed from about 55 degrees above. Output: 4096x512 PNG with a fully transparent background, each frame 512x512. No text.
```

E06 · Smoke puff

Used for chimneys, burning buildings and dust.

PROMPT E06

```
Game VFX: a single soft grey smoke puff, round and billowy, semi-transparent edges, centered. Output: 512x512 PNG with a fully transparent background. No text.
```

E07 · Scorch mark

Left on the ground after explosions.

PROMPT E07

```
Game decal: a dark burnt scorch mark on the ground seen from straight above, irregular soot splatter fading to transparent at the edges. Output: 512x512 PNG with a fully transparent background. No text.
```

E08 · Game logo

Title screen wordmark.

PROMPT E08

```
Logo wordmark reading exactly "IRON FRONTIER" in bold condensed military stencil letters, "IRON" in off-white and "FRONTIER" in mustard gold (#D9AE3A), with subtle scratched metal texture and a thin dark outline. Output: 2048x768 PNG with a fully transparent background.
```
